For a long term approach of floodplain management to decrease the costs of future damages, this digital Regulatory Flood Map (RFM) was produced through a unique process of field surveys, aerial photographs, and computer modeling. The RFM provides important information for floodplain management and regulatory enforcement purposes only and should not be used as the sole source of flood elevation information. The community map repository should be used in conjunction with the RFM for floodplain management activities.

SPECIAL FLOOD HAZARD AREAS SUBMITTED BY THE IL DEPARTMENT OF NATURAL RESOURCES, FLOODWAY AREAS

The community map repository provides a comprehensive database of floodplain information, including flood elevation data, floodway information, and other relevant data. Flood elevations on this map are referenced to the National Geodetic Vertical Datum of 1988 (NGVD 1988). Because changes due to annexations or other reasons may occur, it is recommended to visit the DuPage County Stormwater Management at 1-630-407-6800 to obtain the most up-to-date information.

The floodways were based on hydraulic considerations with regard to requirements of the DuPage Regulatory Flood Map (RFM) and data may be supplemented by FEMA and DuPage flood study updates. A long term approach of floodplain management to decrease the costs of future damages. Base elevation information was obtained in 2008 from the National Geodetic Survey, NOAA, Silver Spring, Maryland.
