

June 29, 2017

To Whom It May Concern:

I have been a Burr Ridge, IL resident for 26 years, raised three children in Burr Ridge, and never experienced noise or pollution problems. I have treasured my time and memories in the community. The addition of an asphalt plant in the area will contribute to problems never experienced in the community, such as heavy trucks emitting pollution, additional traffic affecting recreational activities (specifically biking), elevated noise levels, and a reduction in air quality. The village of Burr Ridge and surrounding areas will not benefit from an asphalt plant.

Unfortunately, I am unable to attend the residents' meeting because I am hosting my eighth annual charity event that benefits inner city children. Due to this important commitment, I am unable to attend in person, but please accept this letter as a strong indication of my opposition to the decision of locating an asphalt plant in the Burr Ridge community.

I STRONGLY OPPOSE THIS DECISION.

Sincerely,

Vincent "Bo" Jackson

Burr Ridge Resident
